PROFILE

Computing graduate (First Class Honours, University of Greenwich) who ships products end to end, from stakeholder requirements to production code. Delivered an AI-powered web app solo inside a fixed 126-hour DSDM sprint, diagnosed the root causes of a £390M UK government IT failure, and shipped real client and stadium-deployed technology across two Indonesian ventures.

EDUCATION

University of Greenwich London, UK
BSc (Hons) Computing, First Class Honours. School Prize for Outstanding Undergraduate Achievement (top of cohort) July 2026

UniSadhuGuna International College Tangerang, Indonesia
BTEC HND Computing, Summa Cum Laude, GPA 4.0/4.0. Valedictorian & Best Graduate, Full Distinction across all 15 modules July 2025

EXPERIENCE

Deloitte Professional Community London, UK
Event Logistics & Social Media Coordinator 2025 – Present

- Coordinated end-to-end logistics for professional development events across concurrent workstreams while producing social media content for the network, delivering every session on schedule

PT Persita Tangerang Raya Tangerang, Indonesia
IoT Developer 2025

- Deployed a production IoT waste-monitoring system (Arduino C++, dual ultrasonic sensors) at PERSITA stadium: 72 hours of continuous live operation, ±2% fill-detection accuracy, and 98% Telegram alert delivery, eliminating manual bin inspections

PT Citra Sukses Ekapratama Indonesia
Web Developer 2025

- Owned the full delivery lifecycle (discovery, design, build, client handover) for a production Shopify platform: 40+ live product listings, full payment integration, and a 6-page navigation redesign that cut checkout friction

UniSadhuGuna International College Tangerang, Indonesia
Student Union Events Department Lead & Student Ambassador 2024 – 2025

- Directed campus-wide events as Events Department Lead, supervising a 30+ person team and securing sponsorships, then guided 75+ prospective students per open day and co-delivered workshops to 30+ students per session as Student Ambassador

Joy Kitchen Orpington, London
Head Waiter Sep 2025 – Present

- Delivered consistent, high-touch service across 50+ covers per shift on a high-volume floor with zero POS discrepancies, building composure and prioritisation under sustained pressure

SELECTED PROJECTS

Toss: AI-Powered Food Waste Reduction Web App 2025
Solo, Final Year Project · React/Vite · Node.js/Express · PostgreSQL · Google Gemini API · JWT Auth

- Shipped a complete AI-powered product solo inside a fixed 126-hour DSDM window, delivering 100% of Must/Should-prioritised requirements across 6 MoSCoW-managed timeboxes
- Defined 3 ingredient-input modes (typed search, barcode scan, visual recognition) and replaced a ranked-list recipe output with a single, rationale-backed recommendation, validated against Nielsen's 10 usability heuristics and 2 competitor benchmarks

Libra: Requirements Failure Analysis of a £390M UK Government IT Project 2025–26
Academic · Requirements Management

- Diagnosed 3 systemic requirements-elicitation failures behind the Libra magistrates' courts IT collapse (£146M bid to £390M final cost), producing a redesigned specification with documented NFRs and acceptance criteria
- Authored a 3,299-word critical analysis proposing JAD workshops and DSDM iterative delivery as alternatives, grounded in stakeholder analysis across 4 distinct stakeholder groups

SKILLS

Product & Delivery: Agile · Scrum · DSDM · MoSCoW · User Stories · Requirements Elicitation · Stakeholder Management · Jira · Notion
Engineering: Python · JavaScript/TypeScript · SQL · React · Node.js/Express · REST APIs · HTML5/CSS3 · Git/GitHub
Design & Data: Figma · User-Centred Design · Usability Testing · A/B Testing · PostgreSQL

CERTIFICATIONS & LANGUAGES

Certifications: Oracle Database (SQL Programming, Design), Generative AI (Microsoft & LinkedIn Learning) | Languages: English (Professional), Indonesian (Native), Mandarin (HSK 3), Hokkien (Conversational)
